

READING YOUR SLEMCO BILL

A typical SLEMCO residential bill is illustrated on the left. On this example, there are three line items: Energy Charge, Security Light and Operation Round-Up.

1 Energy Charge

The Energy line item is the cost for the kilowatt hours used. The cost consists of two basic components: the Base SLEMCO Rate and the Power Cost Adjustment, multiplied by the number of kWhs used.

Energy Cost = (Base SLEMCO Rate + Power Cost Adjustment) x kWh

The Base SLEMCO Rate and Power Cost Adjustment (PCA) are described below.

2 Security Light

This charge is only for customers with Security Lights

3 Operation Round-Up

This is a voluntary payment that rounds up the bill to the nearest dollar. This is used to help needy people in the SLEMCO service area (whether they are SLEMCO customers or not) with things that include, but are not limited to food, clothing, medicines, eye glasses, wheel chair ramps and hearing aids. It is not used to help pay utility bills.

Base SLEMCO Rate and Power Cost Adjustment
SLEMCO does not own power generation facilities. SLEMCO is party to a Power Supply and Service Agreement with Louisiana Generating, LLC (LaGen), from which SLEMCO purchases all of its electrical power. The LPSC allows SLEMCO to recover this cost of power from its consumers. This cost of power is a pass through cost with no markup.

The **Power Cost Adjustment (PCA)** is the method used to recover the fuel portion of the total power cost.

The **Base Energy Rate Adjustment (BEA)** is the method used to recover the non-fuel portion of the power cost.
