**ABOUT SLEMCO**

- Not-for-profit electric distribution cooperative.
- Owned by its customers.
- Local offices and local service for your convenience.
- A vital part of the communities it serves for more than 75 years.
- Large and diverse commercial and industrial base.

**COOPERATIVE NETWORK**

- Part of a state, regional and national network of nearly 1,000 customer-owned electric cooperatives.
- Network partnership provides resource pool for engineering, IT, financing, governmental affairs, etc.
- Nationwide mutual assistance agreements provide rapid support for emergency restoration situations.

**THE RIGHT RATES AND RELIABILITY**

- SLEMCO is the least-cost provider in the State of Louisiana.
- Not-for-profit model allows low distribution cost.
- Premium placed on service reliability, especially for industries such as manufacturing facilities, processing plants or any other commercial/ industrial enterprise.
- SLEMCO’s power delivery system has been tested by weather events over the years and has been hardened to ensure power keeps flowing in all conditions.

**OUR POWER SUPPLIER**

SLEMCO is proud to have a long-term wholesale power contract with NRG.

NRG is a Fortune 250 company and is the nation’s largest competitive power generator with more than 53,000 MW of fossil fuel, nuclear, solar and wind capacity at nearly 150 generating locations. In this region, NRG’s generation portfolio exceeds, 4,400 MW and includes a diverse mix of base load, intermediate, peaking natural gas and coal-fired generation.

**CAPACITY TO SERVE**

- NRG partnership assures access to long-term, low-cost power to accommodate not only the existing customer base but also meet the needs of prospective and industrial customers.
- Capability of up to 230 kV transmission interconnection in our service area.
- NRG relationship allows us to provide the customer a vast suite of sustainable products and services both on and off the grid.
- Collaborative business frame work integrating a not-for-profit distribution cooperative with an independent power producer enables customers to benefit from least-cost solutions for their energy requirements.
